

2590S Threaded Wellhead

The 2590S coiled tubing wellhead is installed directly on the casing master valve, using standard casing threads. The design includes a 2" LP annular flow port and a 0.5" NPT gauge port.

Features & Benefits

- The hanger assembly utilizes the same element and slip assemblies as the 2590S hanger series.
- Integral Pin-Down thread design eliminates additional thread connections and leak paths.
- Side outlet provides large flow area for casing annular production.
- Compact design for minimal wellhead height.
- Hydraulic pack-off element provides complete live well control during installation and retrieval of coiled tubing.

2590S Threaded Wellhead Assembly		
ITEM	QTY.	DESCRIPTION
1	2	Needle Valve
2	1	Bushing
3	3	Nipple
4	3	Ball Valve
5	1	Forged Tee
6	1	Nipple
7	1	2590S Hanger
8	1	Gate Valve
