

# ARROWSET PRODUCTION PACKER

## Description

The Select Energy Arrowset I-X Wireline Set Production Packer is a retrievable, double grip production packer. A conversion of the Arrowset I-X that has over 50 years of success in the oilfield. The Arrowset I-X is one of the most versatile tools on the market today. A large internal bypass reduces the swabbing effect during run-in and retrieval, and closes when the packer is set. When the packer is released, the bypass opens first, allowing the pressure to equalize before the upper slips are released. The Arrowset I-X Wireline set also features a upper-slip releasing the system that reduces the force required to release the packer. A non directional slip is released first, making it easier to released the other slips.

## Features & Benefits

- Ability to hold high differentials from both above and below.
- Requires only 1/4 rotation for release.
- Wireline set.
- Safety Shear release option available.
- Optional elastomers for hostile environments.
- Bypass Valve is below upper slips so debris is washed when valve is opened.
- Tool is available in low pressure to high pressure applications.
- Utilizes a On / Off Tool to connect to tubing after set.
- Full openings give unrestricted flow, and allows the passage of wireline tools and other accessories.

## Specifications

Casing Size (in. / mm)	Casing Weight (lbs/ft / kg/m)	OD (in. / mm)	ID (in. / mm)
4.5 - (114.3)	9.50 (14.10)	3.750 (95.3)	1.938 (49.23)
	13.15 (20.10)		
5.5 - (139.7)	14.0 (20.80)	4.625 (117.5)	1.938 (49.23)
	20.0 (29.80)		
7 - (177.8)	17.0 (25.30)	6.000 (152.4)	2.500 (63.50)
	26.0 (38.70)
