

## Description

The Coiled Tubing Cable Clamp Assembly is used below a Dimple Connector or Dimple-Grapple Connector when the operator has wireline inside the coiled tubing. The Cable Clamp Assembly allows the operator to run a more conventional workover without having to remove the wireline. The assembly secures the wireline safely to the side of the coiled tubing to allow pumping of fluids or dropping disconnect balls.

## Applications

- Well workovers that require wireline to be left in the well during operations.

## Features & Benefits

- Secures wireline safely.
- Compact design.
- Allows pumping and disconnect ball.
- Easy field service.

## Specifications

Coiled Tubing Sizes (in. / mm)	Tool OD (in. / mm)	Tool ID (in. / mm)	Connections	Temp. Rating (°F / °C)	PSI (MPa)
1.25 (31.75)	1.6875 (42.86)	0.937 (23.79)	Available in various threads to suit customer requirements	-40 - 275 (-40 - 135)	2000 (14)
1.75 (44.45)					
2 (50.80)	2.125 (53.97)	1.25 (31.75)			
2.375 (60.32)					
2.625 (68.69)	2.5 (63.5)	1.5 (38.10)			
2.875 (73.02)					
3.5 (88.9)	3 (76.2)	2 (50.80)
