Description

The Retrieval Drop Dart isolates the coiled tubing ID for retrieval or repositioning of coiled tubing that has been hung off in a wellbore. The Dart is used in conjunction with a Landing Nipple for sealing and is run and retrieved with wireline.

Applications

- Isolate a coiled tubing ID to retrieve or reposition the coil string.

Features & Benefits

- Fishing neck on dart for wireline installation or retrieval.
- Dart provides a positive seal in the Landing Nipple.

Specifications

Coiled Tubing Sizes (in. / mm)		Landing Nipple Profiles (in. / mm)	
1.25	(31.75)	0.880	(22.35)
1.50	(38.10)	1.050	(26.67)
1.75	(44.45)	1.268	(32.20)
