

## Vertical Access Dual Wellhead

The Vertical Access Dual Wellhead provides a means for hanging two coiled tubing strings. The integral pack-off and slip design, along with the unique upper valve swivel connections, provides maximum safety and versatility at a low installed height.

### Features & Benefits

- Vertical access to both primary and secondary strings allows smooth passage of wireline tools.
- Integral Coiled Tubing Hangers allows compact design and low wellhead height.
- Exclusive swivel connections allow close valve make-up.
- Short overall height permits assembly and testing in the shop, reducing time on location.
- Compact design for minimal wellhead height.

Vertical Access Dual Wellhead Assembly
