

## Description

The Select Casing Scraper is used to remove foreign matter on the inside casing wall (of casing or tubing) in order to provide a smooth clean casing I.D. for running sub-surface equipment (such as packers). The Casing Scraper features a one piece body with full 360o casing I.D. coverage provided by six spring loaded Scraper Blades. The design also features a large bypass area around and between the blades for ease of circulating. Each blade is secured in its own individual pocket and ensures that all thrust and rotational forces are absorbed directly by the one piece body. No special tools other than a Pipe Vise are required to change the blades or springs. The Casing Scraper features leaf type Incoloy Springs behind each self-sharpening blade, providing maximum usage before repairs or replacement is necessary.

## Specifications

Casing Size (in. / mm)	Casing Weight (lbs/ft / kg/m)	Collapsed OD (in. / mm)	Expanded OD (in. / mm)
4.5 - (114.3)	6.75 (10.04)	3.62 (91.9)	4.42 (112.3)
	16.6 (24.70)		
5.5 - (139.7)	9.00 (13.39)	4.50 (114.3)	5.28 (134.1)
	23.0 (34.23)		
7 - (177.8)	13.0 (19.34)	5.71 (145.0)	6.72 (170.6)
	40.0 (59.82)
